Because lacking coverage shouldn't be an obstacle.

*No cost to you with most insurance or with HHS/CDC funded Bridge Program eligibility. Vaccines subject to availability. State-, age- and health-related restrictions may apply.

†No-cost COVID-19 testing may be available for uninsured patients who meet federal eligibility criteria or insured patients depending on plan benefits. Contact your plan to confirm coverage criteria and copayment amount before scheduling your test. You may be billed by Walgreens, and if applicable, the laboratory, for up to the full price of the test if you owe a copay, your insurance denies coverage or if you don't meet eligibility criteria for government no-cost testing programs.

No-cost COVID-19 vaccine & testing

Options for people without insurance available

Get vaccinated

If you're currently without health insurance or yours doesn't cover the COVID-19 vaccine, you can still get it.*
