Vitaflo June Metabolic Newsletter

SC | Draft #2 | July 3, 2025

**Subject Line:** Big Changes, Bigger Impact: What's new in PKU

**Preview Text:** Whether it's a new formula or GMP education, Vitaflo™ has all your PKU questions answered, all in one place.

**Alt Subject Line:** Support for every step of the PKU journey

**Alt Preview Text:** From transitions to reimbursement—Vitaflo™ is here to help.

### **Module 1: PKU start to PKU sphere NEXT15 Transition**

**Headline:** From start to sphere; PKU sphere NEXT15™ makes transitions easier.

Our latest formula, **PKU sphere NEXT15**, makes it simple for individuals with PKU to move from their trusted PKU start™ to an innovative blend of GMP, AA, and DHA.

Older children, teens, and adults alike who exhibit higher Phe tolerances should have a quick and efficient transition to **PKU sphere NEXT15**, promoting patient satisfaction and seamless conversions. For children with lower Phe tolerances, a more gradual transition away from **PKU start** is integral to ensure good metabolic control and limit any negative side effects.

Interested in learning more about **PKU sphere NEXT15**? Check out our downloadable introduction to answer all your transition and product questions.

### **Module 4: Webinar: GMP and Phe – Let's Talk Phe Tolerance!**

**Headline:** Let's Talk Phe and GMP Tolerance

Curious how GMP affects patients with Phe tolerances? Check out our Let's Talk Phe Tolerance Webinar with featured speaker Katie Arduini, RD, LDN, CLS. Learn about which patients are suitable candidates for all things GMP-based PKU MFs and who may need to add in amino acid-based products with this webinar.

How do different life stages impact daily phenylalanine levels in PKU? What are real patients saying in the **PKU sphere** survey? Katie explores these important topics and shares insights into the role and effects of GMP-based PKU foods, helping you better understand how they may benefit your patients.
