

Accelerating Cures through Patient-Driven Research:

Tissue Donation Biobanking Data Harmonization Genomic Sequencing

Are you a rare cancer patient?

The Rare Cancer Research Foundation has created flexible, collaborative infrastructure that directly benefits you.

Right now, we can collect your rare cancer tissue or fluid from a procedure through **any institution across the country** and directly connect it to researchers who are studying your disease.

Donation is safe, your privacy is protected, and you can make a difference for your cancer community!
